Tirth Shah

Frontend Developer | Angular | React | TypeScript

Gandhinagar, Gujarat, India | +91 8000914488 | shahti42@gmail.com | tirthshah07.com | linkedin.com/in/tirthshah007 | github.com/tirthshah07

PROFESSIONAL SUMMARY

Frontend Software Engineer with 4 years of experience building scalable, responsive web applications using Angular (v10–19), TypeScript, RxJS, and React. Experienced in standalone components, modular lazy-loaded architecture, reusable component development, Angular Material and SCSS styling, performance optimization, JWT/RBAC authentication, payment gateway integration, internationalization (i18n), and REST API integration. Recently upgraded a Vite-based React codebase from React 17 to React 19. Works in Agile/Scrum teams, with backend exposure to Node.js and Django.

TECHNICAL SKILLS

- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS
- **Frameworks & Libraries:** Angular (v10–19), Standalone Components, AngularJS, React, RxJS, Angular Signals, Reactive Forms, jQuery
- **UI & Data:** Angular Material, PrimeNG, AG Grid, Bootstrap, Tailwind CSS, Chart.js, Highcharts, IndexedDB, Responsive Design
- **Authentication & Security:** JWT, Refresh Tokens, Role-Based Access Control (RBAC), Route Guards
- **Backend (Familiar):** Node.js, Express.js, Django, REST APIs
- **Tools & Practices:** Git, GitHub, Code Reviews (Pull Requests), CI/CD (Basic), Postman, Vite, Agile/Scrum, Performance Optimization, Lazy Loading, i18n, Claude Code, Google Antigravity

WORK EXPERIENCE

Software Engineer — IndiaNIC

Ahmedabad, Gujarat | Nov 2025 – Present

- **Skills Check (EdTech platform):** Core frontend developer for the learner web app and admin panel of a platform built to scale to 50–70 schools, currently onboarding its first schools ahead of a full rollout.
- Built 15+ reusable standalone assessment question-type components (MCQ, drag-and-drop, audio, sequence selection, fill-in-the-blank) and integrated an EPUB reader with highlight and bookmark support, styled with SCSS.
- Developed admin-side assessment and question-bank management, plus reusable data-table features (enable/disable/delete, global sorting, persistent pagination); resolved client- and QA-reported defects.
- Improved rendering performance using lazy-loaded routes and @for with track for large lists.
- **CambridgeQR:** Implemented RBAC-based authentication and role-gated dashboards with permission-based feature access and asset rollback/version-request workflows.
- Delivered the QR Generator page and publishing module with global CSV export and draft/submitted workflows for a platform managing 10,000+ dynamic QR codes.
- Upgraded a Vite-based React 17 template to React 19, reproducing pixel-accurate UI under a namespaced design system.
- **Action Truck Parts (E-commerce):** Fixed product-listing search and sort, updated similar-products state and routing, and corrected order and cart total calculations.

Software Engineer — Arbelos Solution

Gandhinagar, Gujarat | Nov 2024 – Nov 2025

- Built a product serving 500–1,000 users from scratch, using a fully lazy-loaded Angular 18 architecture with standalone components and reusable services.
- Developed custom directives (user permissions, image handling, infinite scroll) and reusable UI components with Angular Material and SCSS.
- Integrated 3 payment gateways and built authentication flows with JWT, refresh tokens, and RBAC.
- Optimized performance with Angular Signals for reactive state, lazy loading, and @for with track; improved UX with Reactive Forms validation and responsive design.

Angular Developer — Samcom Technobrains

Ahmedabad, Gujarat | Dec 2023 – Sep 2024

- Built an MCP (Model Context Protocol)-based chatbot application with document search via REST APIs and a responsive SCSS UI.
- Implemented multilingual support (i18n) for 4 languages and role-based authentication using JWT and Route Guards.
- Delivered an export module generating thousands of flat files for ICEGATE (Indian Customs) compliance.

Frontend Developer — Cutting Edge Infotech

Vadodara, Gujarat | Sep 2022 – Nov 2023

- Designed and delivered a Travel Portal in Angular 14 with role-based hotel booking workflows.
- Built dynamic, mobile-responsive web applications using AngularJS, jQuery, Bootstrap, and REST APIs.

EDUCATION

B.Tech, Electronics & Communication Engineering — Government Engineering College, Bharuch | 2018 – 2022
